

Brainstorming & Idea Prioritization Template

Date	11 july 2026
Team ID	SWTID-2026-7290
Project Name	Smart Lender
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Harshitha Reddy	Develop a Machine Learning model to predict whether a loan application should be approved based on applicant details.	Machine Learning	SWTID-2026-7290
2	Janardhan Kaavali	Build a Flask-based web application that allows users to enter loan details and receive instant predictions.	Web Development	SWTID-2026-7290
3	Thommandru Kirananjali	Compare the performance of Decision Tree, Random Forest, KNN, and XGBoost algorithms to identify the best model.	Model Evaluation	SWTID-2026-7290
4	Muni Mohan Krishna Krishna Reddy	Design an intuitive and responsive user interface for applicants and bank staff using HTML, CSS, and Bootstrap.	User Interface	SWTID-2026-7290
5	Hepseba Bezawada	Implement data preprocessing techniques such as handling missing values, encoding categorical variables, feature scaling, and model deployment.	Data Engineering	SWTID-2026-7290

Brainstorming & Idea Prioritization Template

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Build and compare Machine Learning models (Decision Tree, Random Forest, KNN, and XGBoost) for accurate loan approval prediction.	High	High	Yes	Yes
2	Develop a Flask-based web application with a simple and responsive interface for loan prediction.	High	High	Yes	Yes
3	Perform data preprocessing, model evaluation, and deploy the final model for real-world usage.	High	High	Yes	Yes
