

Project Executable Files

Date	13 July 2026
Team ID	SWTID-2026-1298
Project Name	Smart Lender
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Smart_Lender

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	http://127.0.0.1:5000 Local Deployment URL
Login Credentials (Demo)	Not required
Platform / Hosting Provider	Flask , gradio
Repository Link	https://github.com/harshzxx/SmartLender-Loan-Prediction.git

Demo Video Link	https://drive.google.com/drive/u/0/folders/1AGDAJTeS8LxF0V6VW1MP_7yhBASCVNJZ
------------------------	---

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Prerequisites

- Python 3.13 or later
- pip (Python Package Manager)
- Visual Studio Code (Recommended)

- [Installation](#)

Steps

1. Download or clone the project:

```
git clone https://github.com/yourusername/Smart-Lender.git
```

2. Navigate to the project

```
directory: cd Flask
```

3. Install the required dependencies:

```
pip install -r requirements.txt
```

4. Start the Flask application:

```
python app.py
```

5. Open the application in your

```
http://127.0.0.1:5000
```

6. Click "Start LoanAssessment"

on the Home Page.

7. Enter the applicant details in

the Prediction Form.

8. Submit the form to receive the loan eligibility prediction.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Prediction accuracy depends on the quality of the training dataset.	Train with larger and more diverse datasets.
2	The application predicts loan eligibility but does not explain the reasons behind the prediction.	Integrate Explainable AI (XAI) techniques such as SHAP or LIME.
3	The application currently operates on a local Flask server.	Deploy the application on a cloud platform such as Render or Railway for public access.
